Unified Security Management

A unified security management solution provides access to critical data of all your life safety systems under one software platform to help you make informed decisions in a threatening event.

- Access Control
- Video Surveillance
- Intrusion Detection
- License Plate Recognition
- Mass Notification
- Fire Alarm

In today's world, safety and security are increasing concerns for business owners.

As a local leader in commercial security, Keystone Fire and Security offers custom security solutions with the unique ability to provide interoperability with a variety of systems that work together to keep your staff and facility safe and secure. Our expertise in system unification allows us to provide you with a solution built from the ground up or to work with existing systems to enhance your organization's security objectives.

DESIGN

We facilitate team discovery meetings with your staff to determine the needs and desired outcomes of the system. All information is kept confidential and we provide non-disclosure statements to further protect the integrity of your business security.

PROJECT MANAGEMENT

Professional project management is key to successful implementation. Our project managers have the skills, experience, and resources to help keep project momentum going and everyone informed.

INSTALLATION

We offer installation by experienced and professional certified technicians who are highly skilled in solving the most challenging installations. Technical excellence and unsurpassed quality have always been and will remain the hallmark of Keystone Fire and Security's commitment to our clients.

SUPPORT

Once a system is installed our support does not stop. Using hardware and software diagnostics, our established support plan will maintain your system and ensure it will be reliable when you need it.
